

NAVEEN MUTHUKUMAR

Full-Stack Developer | React.js | Next.js | Drupal | WordPress | REST API
Chennai, India | +91-9360146247 | naveenmuthukumar2306@gmail.com | [Portfolio](#)

PROFESSIONAL SUMMARY

Dedicated Full-Stack Developer with 2+ years of hands-on experience building scalable, production-grade web applications using React.js and Next.js. Skilled in REST API integration, WebSocket real-time communication, component-based architecture, state management, and responsive UI design. Experienced in end-to-end CMS development and migration using Drupal and WordPress. Strong command of JavaScript (ES6+), Tailwind CSS, MySQL, Git, and Agile methodologies. Proven ability to deliver clean, maintainable code and collaborate effectively in cross-functional teams.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), Python, HTML5, CSS3, PHP
Frameworks:	React.js, Next.js, Tailwind CSS, WordPress, Drupal 7 / Drupal 10
APIs & Real-Time:	RESTful API, WebSockets, JSON, Async/Await, Axios
CMS & Theming:	Drupal Migrate API, Twig Templating, Elementor Page Builder, Theme Hooks
Database:	MySQL, Structured Data Migration
Dev & Tools:	Git, GitHub, npm, FTP, VS Code, Responsive Design, Cross-Browser Testing
Methodologies:	Agile, Scrum, Code Review, Feature-Branch Workflow, SOLID Principles

WORK EXPERIENCE

iNoesis Technologies Private Limited — Chennai

August 2023 – Present

Full-Stack Developer (Frontend Focus)

Project 1: quicktest.diy — AI-Powered Quiz Generation Platform

- Architected and developed an AI-powered quiz platform using React.js, Next.js, and Tailwind CSS enabling automated question generation from uploaded documents and custom topics, cutting manual content creation time by ~70%
- Integrated RESTful APIs for user authentication, quiz lifecycle management, and question bank operations using Axios with async/await for non-blocking, efficient data handling
- Built WebSocket-based real-time communication layer enabling live quiz sessions with instant updates, reducing interaction latency and improving participant engagement
- Designed and implemented a reusable, modular UI component library following SOLID principles and component-based architecture, improving code reusability and reducing development effort
- Developed student invitation workflows, role-based access control (RBAC), and an analytics dashboard with data visualizations for educator performance tracking
- Applied performance optimizations including lazy loading, code splitting, and React memoization, improving page load speed and Core Web Vitals scores
- Participated in Agile/Scrum sprints, sprint planning, daily standups, and peer code reviews; managed version control using Git with feature-branch workflow on GitHub

Project 2: ISME.org — Drupal CMS Website Migration

- Led full end-to-end migration from Drupal 7 to Drupal 10, enhancing website security, WCAG 2.1 accessibility compliance, SEO, and long-term maintainability
- Executed structured content migration using Drupal Migrate API, migrating all nodes, users, taxonomy terms, and media assets with 100% data integrity and zero data loss
- Converted legacy PHPTemplate (.tpl.php) theme files to Twig templating engine, implementing custom theme hooks, preprocess functions, and template overrides
- Optimized Drupal caching layers and performed database query tuning, resulting in measurable page load performance improvements post-migration
- Planned and executed zero-downtime production deployment with a tested rollback strategy, ensuring continuous availability throughout the go-live process

- Conducted end-to-end regression testing across all site features and content types to validate migration accuracy and functional parity

Project 3: Dynamic Webpage Development — WordPress & PHP

- Designed and developed responsive, mobile-first, cross-browser-compatible webpages using WordPress and Elementor Page Builder for multiple client projects
- Extended WordPress backend with custom PHP integrations, shortcodes, and plugin customizations to fulfil client-specific functionality requirements
- Managed file deployment and production hosting via FTP, ensuring version consistency and uptime across all delivered client websites

EDUCATION

Bachelor of Computer Applications (BCA)

2024 – 2027 *(In Progress)*

Madras University – Distance Education, Chennai

Diploma in Electrical Engineering

2019 – 2022

Alagappa Polytechnic College

CERTIFICATIONS

- Full Stack Developer – MERN Stack Certification | Besant Technologies, Chennai

KEY ACHIEVEMENTS

- Reduced manual quiz content creation time by ~70% by delivering an AI-powered document parsing and automated question generation feature in React.js and Next.js
- Delivered Drupal 7 to Drupal 10 migration for a live production website with 100% data integrity, zero downtime, and full WCAG 2.1 compliance
- Improved application performance scores (Core Web Vitals) through lazy loading, code splitting, and React memoization in a large-scale Next.js application
- Built a fully reusable React.js component library that standardized UI patterns and reduced repetitive development effort across the entire platform
- Delivered 3+ client WordPress projects on schedule by combining Elementor-based design with custom PHP backend integrations

AREAS OF EXPERTISE

Frontend Development • Full-Stack Development • REST API Integration • Real-Time WebSocket Systems • CMS Development & Migration • Responsive Web Design • Component Architecture • State Management • Performance Optimization • Agile / Scrum • UI/UX Implementation • Cross-Browser Compatibility • Code Review • Version Control (Git)
